Frank Chambergo

Software Engineer | Technical Curriculum Developer | Technical
Instructor

Washington DC-Baltimore Area

Summary

I am a full-stack software engineer with a robust background in developing innovative solutions and a deep commitment to empowering the next generation of tech enthusiasts. My career is driven by a dual mission: to build cutting-edge technology and to make programming accessible and engaging for learners of all ages.

Experience

Udacity

Content Maintenance

February 2026 - Present (3 months)

California, United States

Flatiron School

AI Engineering Apprentice

February 2026 - Present (3 months)

Coursera

Content Curator & Subject Matter Expert | Software Development

October 2025 - March 2026 (6 months)

California, United States

Content Curator & Subject Matter Expert for Coursera's Software Development Skill Paths. As part of Coursera's Verified Skill Paths initiative, I contributed to the design of an innovative career-aligned learning model where learners advance through curated, assessment-driven pathways that verify real-world competence.

* Curated and selected existing Coursera courses and modules to develop comprehensive Junior and Intermediate Software Developer learning pathways aligned with industry competency standards

* Facilitated cross-functional handoff sessions with assessment developers to ensure seamless translation of curated content into meaningful skill verification assessments

- * Partnered with assessment developers, instructional designers, learning design consultants, solution engineers, and content production managers to deliver cohesive learning experiences

ClydeBank Media LLC

Course Creator & Technical Editor | QuickStart Guide Academy

August 2025 - February 2026 (7 months)

United States

Developed and edited technical courses focused on AI-powered development tools and web fundamentals, creating comprehensive learning experiences from curriculum design through production.

- * Designed and built the Introduction to GitHub Copilot course from concept to completion, including curriculum architecture, lesson planning, and instructional materials

- * Authored detailed course outlines for Introduction to GitHub Copilot and Introduction to Generative AI, structuring content flow and learning objectives in Notion

- * Reviewed and refined tasks, projects, and course content for HTML, CSS, and JavaScript courses, ensuring technical accuracy and pedagogical effectiveness

- * Created presentation slides in SharePoint and produced video demonstrations showcasing GitHub Copilot workflows and best practices

- * Recorded and edited professional lesson videos with voiceovers and screen walkthroughs using Tella, delivering polished instructional content

TripleTen

Curriculum Developer - Software Engineering

July 2024 - December 2025 (1 year 6 months)

New York, United States

Curriculum Author for TripleTen's Software Engineering Program.

- * Pioneered TripleTen's inaugural AI in Web Development chapter, architecting comprehensive content on AI integration in development workflows including code completion, debugging, error handling, and code review processes

- * Designed innovative curriculum modules covering ethical AI practices and "vibe coding" methodologies, establishing industry-leading educational standards for AI-assisted development

- * Produced high-impact instructional content and video tutorials + walkthroughs for using GitHub Copilot, enabling students to master cutting-edge development tools

- * Developed and quality-assured extensive training materials spanning the full-stack development ecosystem: HTML, CSS, JavaScript, Node.js, Express, React, MongoDB, Mongoose, deployment strategies, and AI integration tools
- * Collaborated cross-functionally with design teams and curriculum authors to establish measurable learning objectives and optimize student outcomes
- * Integrated current industry standards and best practices into program architecture, ensuring curriculum alignment with market demands and professional development requirements
- * Reviewing lesson drafts in Notion and providing feedback
- * Creating quizzes and tasks to enforce software engineering principles for learners

Demonstrated Success, LLC

Software Developer - Full Stack Development

July 2022 - August 2025 (3 years 2 months)

Portsmouth, New Hampshire, United States

- * Supported the Educator Success Platform that gives educators ready access to editable templates and customizable school forms for school-wide communication.
- * Working through frontend and backend components to create new features in user created customizable forms regarding form functionality, improving form completion experience and providing form data & statistics.
- * Conduct code reviews for fellow developers

Technologies Used: Angular · TypeScript · HTML · CSS · JavaScript · Material UI · C# · .NET Framework · .NET Core · ASP.NET · SQL Server · Azure DevOps

Shop Online New York

Technical Writer

February 2025 - May 2025 (4 months)

New York, New York, United States

Developed and standardized comprehensive technical documentation to support developer onboarding and knowledge transfer. Key responsibilities included:

- * Documentation Standardization: Reviewed and updated user manuals to ensure consistent adherence to company style guidelines, improving document quality and user experience across all technical materials.
- * Technical Content Development: Authored and revised specialized documentation covering Flutter development frameworks, cybersecurity

protocols, and system architecture principles, translating complex technical concepts into accessible guidance for development teams.

- * Developer-Focused Communication: Created targeted documentation for both experienced developers and new team members, facilitating smoother onboarding processes and enhanced technical understanding across skill levels.

Upright Education

Lead Instructor - Software Development Bootcamp

March 2024 - August 2024 (6 months)

New York, United States

- * Review and facilitate lesson retrospectives on Mondays and Wednesdays, helping learners reinforce their understanding of the curriculum and coding concepts.

- * Lead Thursday workshop-style sessions, guiding learners through coding projects, exercises, pair programming, and collaborative coding challenges.

- * Provide personalized feedback and guidance to learners on their coding projects, problem-solving techniques, and coding best practices.

- * Collaborate with the curriculum development team to enhance the bootcamp curriculum based on industry trends and learner feedback.

- * Stay updated with the latest programming languages, tools, and software development practices to ensure high-quality instruction.

- * Mentor and support learners in their career development, helping them prepare for success in the software development field.

OpenClassrooms

Mentor - Software Engineering

June 2022 - August 2024 (2 years 3 months)

United States

Mentor for the following OpenClassrooms paths:

- * Web Developer

- * Application Developer - Skills Bootcamp

- * Application Developer Apprenticeship

- * Database Querying with SQL

- * Back-End .NET Developer

As a mentor...

I connected with assigned learners on a weekly 1 on 1 basis to assist them as they progress through their development paths by answering curriculum

related questions, providing guidance on completing the course projects, and providing career related advice.

SEO (Sponsors for Educational Opportunity)

Teaching Assistant - Software Engineer, Tech Developer Program

June 2024 - July 2024 (2 months)

New York, United States

Mentor for SEO's Tech Developer's Program:

- Mentored students through the web application development process using Python Flask framework, HTML, CSS, JavaScript and SQLite on Codio
- Prepared and facilitated demos of my student group on the related topics of everyday lessons
- Hosted office hours and provided on-call support; Ensured students have the guidance and support they need to overcome challenges and excel in their group projects.
- Guided student groups in the creation of professional, portfolio-worthy programming projects, and forming professional project presentations leading to group awards per student.
- Lead a smooth transitional flow from student project presentation to another on presentation days.
- Connected individually with each learner in my student group to understand their goals within the tech space during and post the tech developer program.

Work-Based Learning Alliance

Mentor - Web Development

February 2024 - February 2024 (1 month)

- * Provided hours of feedback and mentorship every week to 3 high school student groups working to develop a functional web application.
- * Overviewed project source code providing suggestions on how to improve code quality, organization and performance.
- * Provided feedback on practice presentations to help prepare for their final presentation

Chegg Inc.

Mentor - Software Engineering Course, Thinkful

August 2023 - February 2024 (7 months)

Mentor for Thinkful's Frontend Development Course

- * Engaged with students in weekly 1-on-1 mentoring sessions bringing industry knowledge and technical expertise to provide them with support and guidance as they progress through the curriculum.

- * Provided 1-on-1 support by answering curriculum related questions, helping debug coding issues and review curriculum material.

W3Schools.com

Lead Instructor - Web Development Bootcamp

May 2023 - October 2023 (6 months)

San Francisco, California, United States

Leading the instruction of W3School's Web Development Bootcamp

- * Preparing and delivering lessons on the following curriculum topics:

-> HTML, CSS, JavaScript, Git, React, Node.js and SQL

- * Giving constructive feedback on weekly assignments

- * Guiding and supporting students during stand hands on projects when ended

- * Sharing personal experiences and giving expectations of a real world software development role

- * Reviewing and brainstorming ideas on how to improve the bootcamp's curriculum

Fullstack Academy

Mentor - Web Development Bootcamp, Amazon Career Choice

February 2023 - October 2023 (9 months)

- * Supported students through exercises designed to build knowledge and skills and promote grit, problem-solving and a collaborative learning community.

- * Graded student assignments & projects

- * Answered curriculum related questions through Zoom chat

- * Helped students troubleshoot code & solve setup related issues

- * Provided 1-on-1 support during office hours and after lecture when students had time to work on their assignments.

- * Shared advice and expertise when setting up and splitting group project work

- * Technical support for the following curriculum related topics:

-> HTML/CSS - Flexbox, Media Queries, CSS Selectors; JavaScript - ES6, DOM manipulations, Data Structures; Postgres - SQL commands, pg library, DB adapters; Express - RESTful Routing, JWT tokens, User Auth, Bcrypt; React - Hooks, React Router, Controlled Forms, HTTP requests; Node - NPM packages, Modules, Async, Importing/Exporting; Git/Github - Commits, Merges, Pull Requests

Montgomery College

Lead Instructor - Montgomery College, Montgomery Can Code

July 2023 - August 2023 (2 months)

Rockville, Maryland, United States

Lead Instructor of the Montgomery Can Code camp:

- * Delivering instruction of the Everyone Can Code Apple curriculum to rising 6th - 8th graders (remote and in-person) using Swift Playgrounds on the provided iPads in 1 week camps. Within each weekly camp, the following concepts were explained in a child friendly manner:

- > Commands, Functions, For Loops, While Loops, Conditionals, Logical Operators, Variables

- * Managing classroom time effectively by implementing discipline, time management, and organization consistent with the program policy.

Capital One

Instructor - Software Engineering, Capital One Developer Academy
May 2022 - February 2023 (10 months)

Richmond, Virginia, United States

Software Engineering Instructor for Capital One's CODA Program.

- * Instruction and instructional support in full stack software development to a cohort of 130+ recent college graduates

- > Git, GitHub, HTML, CSS, JavaScript, Node.js, Express, PostgreSQL, MongoDB, TypeScript, Angular, React

- * Answered curriculum related questions through Zoom and Slack

- * Delivered 1 on 1 tutoring sessions on curriculum material

- * Prepared for and facilitated React coding workshops for a group of 10 students

- * Led daily stand-ups for a team of 7 students

- * Graded weekly + unit project assignments through Google Classroom.

Facilitated 1 on 1 and/or group review sessions on those projects.

Hackathon Mentor for Capital One's 2022 Software Engineering Summit

- * Team mentor and team lead to the 2nd place winning team. 2nd place out of a total of 10 teams.

- * Provided project support to a team of 5 summiteers by answering technical questions of our chosen technologies (React & Python), explaining how to use the technologies, and providing solution suggestions.

Curriculum Developer for Capital One's 2023 Tech Minimester

- * Put together the first day of instructional curriculum content utilizing JavaScript and Node.js that introduces the following material:

- > Data Types, Variables, Conditionals, Functions, Loops

- * Created individualized & group coding activities and exercises with regards to the first day of material

GEICO

2 years 4 months

Software Engineer III - Full Stack Development

November 2020 - April 2022 (1 year 6 months)

Chevy Chase, Maryland, United States

GEICO's IT Claims Department

GEICO's Self Service Claim web and mobile application. Helped finalize, prepare and develop certain aspects of the Telematics project of GEICO's DriveEasy mobile application.

Software Engineering Technology Development Program Mentor.

Technologies Used: React, JavaScript, JQuery, HTML, CSS, C# .NET, Azure DevOps

Software Engineer II - Full Stack Development

January 2020 - October 2020 (10 months)

Chevy Chase, Maryland

GEICO's Underwriting Systems Department.

Developed the initial frontend for the Underwriting System Department's API application. This is the frontend to the department's backend application, Generic API to create a company visible full stack application that can view/handle customer data and determine a price that is fair for both the customer and the company. Developed new features and added several restful endpoints to the existing Underwriting System's Generic API. Utilized GEICO's Design Kit for UI components.

Technologies Used: Angular, Typescript, CSS, HTML, C# .NET, Azure DevOps, MS SQL Server, Jasmine, Karma

Altamira Technologies Corporation

Software Engineer

June 2019 - August 2019 (3 months)

McLean, Virginia

Developed a Java program that constructs a MongoDB database replica of a PostgreSQL database that supports the backend of a web application for speed comparisons in storing and querying Geographic Information System data.

Worked cooperatively with other interns & senior developers through code reviews, unit testing and daily stand-ups.

Technologies Used: Java, JUnit Testing, XML, JSON, Docker, Maven, MongoDB, PostgreSQL, Jenkins, Jira, Confluence, Gitlab, Git

City of Rockville

4 years 5 months

Youth Development Practitioner

July 2015 - May 2019 (3 years 11 months)

Rockville, Maryland, United States

Latino Youth Development Program

Camp Leader

January 2015 - December 2017 (3 years)

Rockville, Maryland, United States

After School Adventure/Teen Scene @ Twinbrook Community Recreation Center

Education

University of Maryland

Bachelor of Science - BS, Information Science

Montgomery College

Associate's degree, Computer Science

Flatiron School

AI Engineering Immersive (Experience Developer Track) · (February 2026 - March 2027)
